

Brian Gray is a senior partner at Norton Rose Fulbright Canada LLP in Toronto, where he specializes in intellectual property. He counsels and represents clients in disputes and transactions involving intellectual property and advises entrepreneurs and start up companies on the financing and commercialization of intellectual property. Brian has served for over ten years on the board of the Science Advisory Committee reporting to the Minister of Industry on Science Policy. Brian has also been the lawyer for the Canadian Banking Association and the Canadian Life and Health Association as interveners in the Amazon business method case and represented one of Canada's largest banks in a cheque scanning software patent infringement case. Brian has particular experience in copyright, trade-mark and advertising litigation and in anti-counterfeiting cases. Brian has represented Hollywood studios in numerous copyright cases both as plaintiff and defendant and has represented the Motion Picture Association of America in internet piracy cases. Brian has also acted for Sony Pictures Entertainment and major motion picture studios in copyright infringement cases. Brian was counsel to Twentieth Century Fox and James Cameron in copyright defence work regarding the motion picture Avatar, Brian has written extensively about and litigated copyright, patent, software, advertising and trade-mark issues. Brian is on the editorial board of the American Intellectual Property Law Association (AIPLA) Quarterly Journal. Brian has been a board member of PARTEQ Innovations Inc., a non-profit technology transfer firm affiliated with Queen's University and is a board member of the International Consortium on Anti-Virals (ICAV) another non-profit based at Trent University. Brian has also been a director of two of Canada's National Centres of Excellence research networks in Canada.
